Attention FCC,

Let it be known that our 55+ condominium association of 148 units is in favor of keeping in place BULK internet and television contracts for our residents. To maintain our lower cost for the services, it is better for our residents not to be able to opt out so to ensure a better leverage with our provider of services.

Our cables and hard wiring are already in place for up to two cable service providers, giving our residents the opportunity to make a decision on whether to go with the carrier voted by the Association to provide a unit package or to select another provider on their own.

The fact that we are able to include this type of BULK service with our monthly fee makes it more attractive to new buyers and a benefit to our current residents.

Blue Stream has worked long and hard to provide us with a value oriented service package that other providers cannot match. Price and selection, along with dedicated support and the ease of use as well as the ability to take the cable television service on the road have kept them ahead of the curve.

If you have good service from a good company, you want to keep it and we do with the BULK Agreement signed with Blue Stream! And, based upon our history with this company, I would not hesitate to sign another BULK Agreement contract with Blue Stream.

Keep this in mind when you make your decision—nobody but nobody has ever had anything nice to say about their cable service provider—but we certainly do!

Tom Larson
Vice President HPW2
